

ECO FRIENDLY LIGHT BULBS

By Anthony, Joe, and Barry

This presentation is
going to teach you
about light bulbs and
global warming and
what light bulbs can do
to make a change

WHY BUY ECO FRIENDLY LIGHT BULBS?

ECO FRIENDLY LIGHT BULBS HELP PEOPLE BY...

- ❖ SAVING THEM MONEY
 - ❖ NOT USING AS MUCH ELECTRICITY
 - ❖ AND SAVING THE WORLD!!!!!!!!!!!!
- 

HOW MUCH THEY COST

The Eco friendly light bulbs (LED) are good for the earth. Each bulb is more expensive to buy but using other light bulbs like **the conventional incandescent is actually more expensive because they don't last as long.** (Conventional incandescent is the regular)

Comparing Light Bulbs				
Bulb type	CONVENTIONAL INCANDESCENT	HALOGEN INCANDESCENT	COMPACT FLUORESCENT (CFL)	LIGHT-EMITTING DIODE (LED)
Wattage	60W	43W	15W	12W
Purchase price*	N/A	\$1.25	\$5.50	\$14.75
Energy reduction**	N/A	-25%	-75%	-80%
Annual energy cost***	\$4.80	\$3.50	\$1.20	\$1.00
Expected service life	1,000 hrs.	1,000 - 3,000 hrs.	10,000 hrs.	25,000

THE PROCEDURE TO STOP CLIMATE CHANGE

Step 1: Buy Eco friendly Light bulbs

Step 2: Take out the conventional incandescent light bulbs

Step 3: Install LED Light bulbs

Step 4: When room not in use, turn off lights

Step 5: Save the planet!!!

YOU WON'T
NEED TO BY
LED'S THAT
OFTEN

REMEMBER, if you do the
little things to help the
world you can make a better
place for everyone.

Note: If you don't believe in global warming, check out all the science. People who live on islands, have to constantly move from island to island. Some countries have walls to keep the water out. But Rhode Island and other states will be completely under water because we were Charles and didn't do a thing about it.

This is all the world we have.

Thank you for your cooperation!
